

B710™ FUELTECH

Fuel-Efficient Drive Retread

APPLICATION
Truckload

CONFIGURATION
Tandem Axle

PATTERN DETAILS

The Bandag B710 FuelTech™ drive retread was specifically engineered to complement the Bridgestone M710™ Ecopia™ radial tire. An achievement in low rolling resistance design, the B710 delivers excellent mileage and performance, plus all the eco-friendly benefits of retreading for tandem drive axles in over-the-highway use. The B710 provides the added benefits of EPA SmartWay³ verification and CARB compliance.

- Reduces energy loss, lowering rolling resistance for optimum fuel efficiency.
- Offers long, even wear and reduced rolling resistance by controlling movement of the ribs and blocks during rotation.
- Distributes weight and torque to fight irregular wear for long tread life and overall even wear.
- Complements Bridgestone M710 Ecopia.

SIZES

210

Width: 210 mm
Tread Depth: 25/32

220

Width: 220 mm
Tread Depth: 25/32

230

Width: 230 mm
Tread Depth: 25/32

240

Width: 240 mm
Tread Depth: 25/32
