

B760™ *FUELTECH*

Fuel-Efficient Drive Retread

featured

APPLICATION

Less Than Truckload • Truckload

CONFIGURATION

Tandem Axle

PATTERN DETAILS

The Bandag B760 FuelTech™ drive retread is designed for tandem-axle tractors in truckload and less-than-truckload applications, and was specifically engineered to complement the Bridgestone M760 Ecopia™ radial tire. The advanced tread design and proprietary compound deliver longer wear life than the ultra-fuel-efficient Bandag B710™ FuelTech. Couple that with a highly siped design that delivers traction in all conditions, and you have a SmartWay® verified, CARB-Compliant retread that offers a balance of tread life, traction and fuel efficiency. It's a new kind of thinking that will help you keep a firm grip on your bottom line.

→ **Advanced Tread Design and Proprietary Compound:**

Delivers up to 20% longer wear life than Bandag B710 FuelTech.

→ **Optimized Groove Width:** Helps combat the retention of casing-damaging stones and improves drilling resistance, leading to increased casing life.

→ **Highly Siped Tread Design:** Provides strong traction on wet and dry surfaces.

SIZES

210

Width: 210 mm
Tread Depth: 23/32

220

Width: 220 mm
Tread Depth: 23/32
